- CERTIFICATE OF CONFORMITY

Digital Recorder

Flight Deck Door Monitoring Systems

The new SKYCAM digital recorder has been designed to complement our existing Skycam VDU to provide upto 32 hours of High Quality Video recording onto a single 32Gb SD card. This can be extended using a larger storage card, or by reducing the recording quality.

The Skycam digital recorder will fit directly above or below the Skycam VDU into a standard Flight Deck panel using a 5.75" DZUS footprint.

The Skycam recorder is only 1.1" high therefore maximising the location options on the flight deck.

Alternatively it can be used as a stand alone recorder for many aircraft related purposes and replay Video on a standard Laptop.

- Suitable for new or retrofit installations
- Easy upgrade for existing users of Skycam systems
- Easy to install
- Single Channel operation
- Auto Record Option
- Time and Date display Option
- Compatible with all Skycam Cameras
- EASA approved installation design package and EASA Form 1
- To order, quote Part Number BAW1134-601
